

# COVID-19 Prevention Program (CPP)

## Maxwell Unified School District

This CPP is designed to control exposures to the SARS-CoV-2 virus that may occur in our workplace.

**Date:** August 12, 2021

### Authority and Responsibility

Summer Shadley has overall authority and responsibility for implementing the provisions of this CPP in our workplace. In addition, all managers and supervisors are responsible for implementing and maintaining the CPP in their assigned work areas and for ensuring employees receive answers to questions about the program in a language they understand.

All employees are responsible for using safe work practices, following all directives, policies and procedures, and assisting in maintaining a safe work environment.

### Identification and Evaluation of COVID-19 Hazards

We implement the following in our workplace:

- Conduct workplace-specific evaluations using the **Appendix A: Identification of COVID-19 Hazards** form.
- Document the vaccination status of our employees by using **Appendix E: Documentation of Employee COVID-19 Vaccination Status**, which is maintained as a confidential medical record.
- Evaluate employees' potential workplace exposures to all persons at, or who may enter, our workplace.
- Develop COVID-19 policies and procedures to respond effectively and immediately to individuals at the workplace who are a COVID-19 case to prevent or reduce the risk of transmission in the workplace.
- Review applicable orders and general and industry-specific guidance from the State of California, Cal/ OSHA, and the local health department related to COVID-19 hazards and prevention.
- Evaluate existing COVID-19 prevention controls in our workplace and the need for different or additional controls.
- Conduct periodic inspections using the **Appendix B: COVID-19 Inspections** form as needed to identify and evaluate unhealthy conditions, work practices, and work procedures related to COVID-19 and to ensure compliance with our COVID-19 policies and procedures.

### Employee Participation

Employees and their authorized employees' representatives are encouraged to participate in the identification and evaluation of COVID-19 hazards by:

Employees and authorized employees' representatives are encouraged to participate in the identification and evaluation of potential COVID-19 hazards by maintaining ongoing reciprocal verbal and written communication with administration. In addition to participation in the periodic site evaluations, employees shall be educated and empowered by management to respectfully remind others to follow all policies, procedures, and practices adopted related to COVID-19.

## **Employee Screening**

We screen our employees and respond to those with COVID-19 symptoms by:

Families are strongly encouraged to take temperatures daily and monitor children for symptoms before going to school. Anyone with a fever of 100.4°F, without fever reducer/pain relief medication, or higher should not go to a school site. Personal illness, quarantine, and COVID-19 illness or symptom-related absences will be excused. Students and adults are strongly encouraged to self-screen for respiratory symptoms such as cough and shortness of breath prior to coming to school each day. Students and adults experiencing these symptoms should not attend school.

## **Correction of COVID-19 Hazards**

Unsafe or unhealthy work conditions, practices or procedures are documented on the Appendix B: COVID-19 Inspections form, and corrected in a timely manner based on the severity of the hazards, as follows:

Unsafe or unhealthy work conditions, practices or procedures will be documented on the Appendix B: COVID-19 Inspections form and corrected in a timely manner based on the severity of the hazards. The severity of the unhealthy work conditions, practices or procedures will be assessed through investigation and will be based on compliance with best practices known to reduce or prevent the transmission of COVID-19 as determined by state and local health guidance, regulations, and orders. Interviews with individuals who may be familiar with the condition, practice or procedure being inspected may be conducted as well as meetings with individual(s) who may have valuable contributions toward the assessment of the conditions, practices or procedures. As a part of the assessment process, specific individuals will be identified as responsible for timely correction or improvement of conditions, practices, or procedures, and will be provided instructions for completion. Follow up measures such as check-ins or walk-through visits will be taken to ensure timely implementation of necessary changes.

## **Controls of COVID-19 Hazards**

### **Face Coverings**

We provide clean, undamaged face coverings and ensure they are properly worn by employees that are not fully vaccinated when they are indoors or in vehicles, and where required by orders from the California Department of Public Health (CDPH).

Employees required to wear face coverings in our workplace may remove them under the following conditions:

- When an employee is alone in a room or a vehicle.
- While eating or drinking at the workplace, provided employees are at least six feet apart and outside air supply to the area, if indoors, has been maximized to the extent feasible.

- Employees are required to wear respirators in accordance with our respirator program that meets section 5144 requirements.
- Employees who cannot wear face coverings due to a medical or mental health condition or disability, or who are hearing-impaired or communicating with a hearing-impaired person. Such employees will wear an effective, non-restrictive alternative, such as a face shield with a drape on the bottom, if their condition permits it.
- Specific tasks that cannot feasibly be performed with a face covering. This exception is limited to the time in which such tasks are being performed.

Any employee not wearing a required face covering or allowed non-restrictive alternative, will be at least six feet apart from all other persons unless the unmasked employee is either fully vaccinated or tested at least weekly for COVID-19.

We will not prevent any employee from wearing a face covering when it is not required unless it would create a safety hazard, such as interfering with the safe operation of equipment.

Face coverings will also be provided to any employee that requests one, regardless of their vaccination status.

### **Engineering controls**

For indoor locations, using Appendix B, we identify and evaluate how to maximize, to the extent feasible, ventilation with outdoor air using the highest filtration efficiency compatible with our existing ventilation system, and whether the use of portable or mounted High Efficiency Particulate Air (HEPA) filtration units, or other air cleaning systems, would reduce the risk of transmission by:

We maximize, to the extent feasible, the quantity of outside air for our buildings with mechanical or natural ventilation systems by:

Indoor air quality is essential to providing a safe and comfortable environment for schools and offices. Proper temperature and humidity levels can help slow down the reproduction of viruses and bacteria. The following measures are to be in place:

All systems are on a quarterly preventative maintenance program.

Filters are changed as part of the quarterly program.

Air Purifiers installed in all classrooms.

Teachers encouraged to utilize outside teaching areas.

### **Cleaning and disinfecting**

We implement the following cleaning and disinfection measures for frequently touched surfaces and objects, such as doorknobs, elevator buttons, equipment, tools, handrails, handles, controls, phones, headsets, bathroom surfaces, and steering wheels:

Cleaning - Physical removal of soil (dirt and debris) from surfaces, which can include the use of water and detergent.

Sanitization - Treating a surface to effectively reduce microorganisms of public health significance. Cleaning before sanitizing is always recommended when time permits.

Sanitize the Following Daily:

Desks and chairs

Keyboards, phones, headsets, copy machines

Door handles, handrails, restroom surfaces and sink handles, light switches

Public interface/Interaction areas

Kitchens and food preparation areas

Buses should be thoroughly cleaned daily and after transporting any individual who is exhibiting symptoms of COVID-19.

Should we have a COVID-19 case in our workplace, we will implement the following procedures:

When choosing disinfection products after an in-school COVID-19 case has been identified we will use those approved for the use against COVID-19 and follow product instructions.

### **Hand sanitizing**

To implement effective hand sanitizing procedures, we:

Handwashing one of the most effective ways to prevent the spread of any biological pathogen, including COVID-19. Wash hands thoroughly with soap and water for at least 20 seconds. Thoroughly dry hands.

Types of handwashing stations:

- Classrooms, bathrooms, and staff rooms have sinks. Soap and papertowels will be checked and re-stocked daily.
- Hand sanitizer dispensers-dispensers installed in all high traffic areas.
- Hand sanitizer bottles - readily available

### **Personal protective equipment (PPE) used to control employees' exposure to COVID-19**

We evaluate the need for PPE (such as gloves, goggles, and face shields) as required by section 3380, and provide and ensure use of such PPE as needed.

Upon request, we provide respirators for voluntary use to all employees who are not fully vaccinated and who are working indoors or in vehicles with more than one person.

We provide and ensure use of respirators in compliance with section 5144 when deemed necessary by Cal/OSHA.

We also provide and ensure use of eye and respiratory protection when employees are exposed to procedures that may aerosolize potentially infectious material such as saliva or respiratory tract fluids.

## **Testing of symptomatic employees**

We make COVID-19 testing available at no cost to employees with COVID-19 symptoms who are not fully vaccinated, during employees' paid time.

## **Investigating and Responding to COVID-19 Cases**

We have developed effective procedure to investigate COVID-19 cases that include seeking information from our employees regarding COVID-19 cases, close contacts, test results, and onset of symptoms. This is accomplished by using the **Appendix C: Investigating COVID-19 Cases** form.

We also ensure the following is implemented:

Offered COVID-19 testing at no cost during their working hours at Ampla Healthcare (555 Fremont Street, Colusa, CA 530.458.7830)

## **System for Communicating**

Our goal is to ensure that we have effective two-way communication with our employees, in a form they can readily understand, and that it includes the following information:

- Who employees should report COVID-19 symptoms, possible close contacts and hazards to, and how.

The superintendent will serve as the primary contact and contract tracer, to the extent practicable, when situations arise with a possible COVID-19 exposure or staff member tests positive for COVID-19.

Employees should report COVID-19 symptoms and possible hazards to their immediate supervisor via e-mail, text message, or phone. Employees should be prepared to provide supporting documentation for events that warrant time away from work, i.e. quarantine or isolation.

- That employees can report symptoms, possible close contacts and hazards without fear of reprisal.
- How employees with medical or other conditions that put them at increased risk of severe COVID-19 illness can request accommodations.

In the event where testing is not required, employees can access COVID-19 testing via the District sponsored health plan.

Colusa Health Clinic (151 E. Webster Street, Colusa, CA 530.458.4162)

Colusa Medical Center (199 E. Webster Street, Colusa, CA 530.619.0800).

- Access to COVID-19 testing when testing is required.

- The COVID-19 hazards employees (including other employers and individuals in contact with our workplace) may be exposed to, what is being done to control those hazards, and our COVID-19 policies and procedures.

## **Training and Instruction**

- We provide effective employee training and instruction that includes:
- Our COVID-19 policies and procedures to protect employees from COVID-19 hazards, and how to participate in the identification and evaluation of COVID-19 hazards.
- Information regarding COVID-19-related benefits (including mandated sick and vaccination leave) to which the employee may be entitled under applicable federal, state, or local laws.
- The fact that:
  - COVID-19 is an infectious disease that can be spread through the air.
  - COVID-19 may be transmitted when a person touches a contaminated object and then touches their eyes, nose, or mouth.
- An infectious person may have no symptoms.
- The fact that particles containing the virus can travel more than six feet, especially indoors, so physical distancing, face coverings, increased ventilation indoors, and respiratory protection decrease the spread of COVID-19 and are most effective when used in combination.
- The right of employees that are not fully vaccinated to request a respirator for voluntary use, without fear of retaliation, and our policies for providing the respirators. Employees voluntarily using respirators will be trained according to section 5144(c)(2) requirements:
  - How to properly wear them.
  - How to perform a seal check according to the manufacturer's instructions each time a respirator is worn, and the fact that facial hair can interfere with a seal.
- The importance of frequent hand washing with soap and water for at least 20 seconds and using hand sanitizer when employees do not have immediate access to a sink or hand washing facility, and that hand sanitizer does not work if the hands are soiled.
- Proper use of face coverings and the fact that face coverings are not respiratory protective equipment. Since COVID-19 is an airborne disease, N95s and more protective respirators protect the users from airborne disease, while face coverings primarily protect people around the user.
  - The conditions where face coverings must be worn at the workplace.
  - That face coverings are additionally recommended outdoors for people who are not fully vaccinated if six feet of distance cannot be maintained.
  - Employees can request face coverings and can wear them at work regardless of vaccination status and without fear of retaliation.
- COVID-19 symptoms, and the importance of obtaining a COVID-19 test and not coming to work if the employee has COVID-19 symptoms.
- Information on our COVID-19 policies and how to access COVID-19 testing and vaccination, and the fact that vaccination is effective at preventing COVID-19, protecting against both transmission and serious illness or death.

Training is documented and implemented through our third party vendor, Public School Works.

**Appendix D: COVID-19 Training Roster** will be used to document this training.

## Exclusion of COVID-19 Cases and Employees who had a Close Contact

Where we have a COVID-19 case or close contact in our workplace, we limit transmission by:

- Ensuring that COVID-19 cases are excluded from the workplace until our return-to-work requirements are met.
- Excluding employees that had a close contact from the workplace until our return-to-work criteria have been met, with the following exceptions:
  - Employees who were fully vaccinated before the close contact and who do not develop COVID-19 symptoms.
  - COVID-19 cases who returned to work per our return-to-work criteria and have remained free of COVID-19 symptoms, for 90 days after the initial onset of COVID-19 symptoms, or for COVID-19 cases who never developed COVID-19 symptoms, for 90 days after the first positive test.
  - For employees excluded from work, continuing, and maintaining employees' earnings, wages, seniority, and all other employees' rights and benefits. This will be accomplished by
- Providing employees at the time of exclusion with information on available benefits.

## Reporting, Recordkeeping, and Access

It is our policy to:

- Report information about COVID-19 cases and outbreaks at our workplace to the local health department whenever required by law, and provide any related information requested by the local health department.
- Maintain records of the steps taken to implement our written COVID-19 Prevention Program in accordance with section 3203(b).
- Make our written COVID-19 Prevention Program available at the workplace to employees, authorized employee representatives, and to representatives of Cal/OSHA immediately upon request.
- Use the **Appendix C: Investigating COVID-19 Cases** form to keep a record of and track all COVID-19 cases.

## Return-to-Work Criteria

- **COVID-19 cases with symptoms** will not return to work until all the following have occurred:
  - At least 24 hours have passed since a fever of 100.4 °F. or higher has resolved without the use of fever-reducing medications, and
  - COVID-19 symptoms have improved, and
  - At least 10 days have passed since COVID-19 symptoms first appeared.
- **COVID-19 cases who tested positive but never developed symptoms** will not return to work until a minimum of 10 days have passed since the date of specimen collection of their first positive COVID-19 test.
- A negative COVID-19 test will not be required for an employee to return to work once the requirements for "cases with symptoms" or "cases who tested positive but never developed symptoms" (above) have been met.
- Persons who had a close contact may return to work as follows:
  - Close contact but never developed symptoms: when 10 days have passed since the last known close contact.
  - Close contact with symptoms: when the "cases with symptoms" criteria (above) have been met, unless the following are true:

- The person tested negative for COVID-19 using a polymerase chain reaction (PCR) COVID-19 test with specimen taken after the onset of symptoms; and
  - At least 10 days have passed since the last known close contact, and
  - The person has been symptom-free for at least 24 hours, without using fever-reducing medications.
- If an order to isolate, quarantine, or exclude an employee is issued by a local or state health official, the employee will not return to work until the period of isolation or quarantine is completed or the order is lifted.

Superintendent

January 21, 2021

**Title of Owner or Top Management Representative**

**Signature**

**Date**

## Appendix A: Identification of COVID-19 Hazards

All persons, regardless of symptoms or negative COVID-19 test results, will be considered potentially infectious. Particular attention will be paid to areas where people may congregate or come in contact with one another, regardless of whether employees are performing an assigned work task or not. For example: meetings, trainings, entrances, bathrooms, hallways, aisles, walkways, elevators, break or eating areas, cool-down areas, and waiting areas.

Evaluation of potential workplace exposure will be to all persons at the workplace or who may enter the workplace, including coworkers, employees of other entities, members of the public, customers or clients, and independent contractors. We will consider how employees and other persons enter, leave, and travel through the workplace, in addition to addressing stationary work.

**Person Conducting the Evaluation:**

**Date:**

**Name(s) of Employees and Authorized Employee Representative that Participated:**

<b>Interaction, area, activity, work task, process, equipment and material that potentially exposes employees to COVID-19 hazards</b>	<b>Places and times</b>	<b>Potential for COVID-19 exposures and employees affected, including members of the public and employees of other employers</b>	<b>Existing and/or additional COVID-19 prevention controls</b>

## Appendix B: COVID-19 Inspections

Date:

Name of Person Conducting the Inspection:

Work Location Evaluated:

Exposure Controls	Status	Person Assigned to Correct	Date Corrected
<b>Engineering</b>			
Ventilation* (amount of fresh air and filtration maximized)			
Additional room air filtration			

Exposure Controls	Status	Person Assigned to Correct	Date Corrected
<b>Administrative</b>			
Surface cleaning and disinfection (frequently enough and adequate supplies)			
Hand washing facilities (adequate numbers and supplies)			
Disinfecting and hand sanitizing solutions being used according to manufacturer instructions			

Exposure Controls	Status	Person Assigned to Correct	Date Corrected
<b>PPE</b> (not shared, available and being worn)			
Face coverings (cleaned sufficiently often)			
Face shields/goggles			
Respiratory protection			

\*Identify and evaluate how to maximize ventilation with outdoor air; the highest level of filtration efficiency compatible with the existing ventilation system; and whether the use of portable or mounted HEPA filtration units, or other air cleaning systems, would reduce the risk of COVID-19 transmission. Review applicable orders and guidance from the State of California and local health departments related to COVID-19 hazards and prevention have been reviewed, including the CDPH Interim Guidance for Ventilation, Filtrations, and Air Quality in Indoor Environments and information specific to your industry, location, and operations. We maximize the quantity of outside air provided to the extent

feasible, except when the United States Environmental Protection Agency (EPA) Air Quality Index is greater than 100 for any pollutant or if opening windows or maximizing outdoor air by other means would cause a hazard to employees, for instance from excessive heat or cold.

## **Appendix C: Investigating COVID-19 Cases**

All personal identifying information of COVID-19 cases or persons with COVID-19 symptoms, and any employee required medical records will be kept confidential unless disclosure is required or permitted by law. Un-redacted information on COVID-19 cases will be provided to the local health department, CDPH, Cal/OSHA, the National Institute for Occupational Safety and Health (NIOSH) immediately upon request, and when required by law.

**Date:**

**Name of Person Conducting the Investigation:**

**Name of COVID-19 case (employee or non-employee\*) and contact information:**

**Occupation (if non-employee\*, why they were in the workplace):**

\*If we are made aware of a non-employee COVID-19 case in our workplace

**Names of employees/representatives involved in the investigation:**

**Date investigation was initiated:**

**Locations where the COVID-19 case was present in the workplace during the high-risk exposure period, and activities being performed:**

**Date and time the COVID-19 case was last present and excluded from the workplace:**

**Date of the positive or negative test and/or diagnosis:**

**Date the case first had one or more COVID-19 symptoms, if any:**

**Information received regarding COVID-19 test results and onset of symptoms (attach documentation):**

**Summary determination of who may have had a close contact with the COVID-19 case during the high-risk exposure period. Attach additional information, including:**

- The names of those found to be in close contact.
- Their vaccination status.
- When testing was offered, including the results and the names of those that were exempt from testing because.
  - They were fully vaccinated before the close contact and do not have symptoms.
  - They returned to work per our return-to-work criteria and have remained symptom free for 90 days or, for those that never developed symptoms, for 90 days after the initial positive test.
- The names of those that were excluded per our Exclusion of COVID-19 Cases and Employees who had a Close Contact requirements.
- The names of those exempt from exclusion requirements because:
  - They were fully vaccinated before the close contact and did not develop COVID-19 symptoms.
  - They returned to work per our return-to-work criteria and have remained symptom free for 90 days or, for those that never developed symptoms, for 90 days after the initial positive test.

Notice given (within one business day, in a way that does not reveal any personal identifying information of the COVID-19 case) of the potential COVID-19 exposure to:

Names of employees that were notified:	Names of their authorized representatives:	Date

Independent contractors and other employers present at the workplace during the high-risk exposure period.

Names of individuals that were notified:	Date

What were the workplace conditions that could have contributed to the risk of COVID-19 exposure?

What could be done to reduce exposure to COVID-19?

Was local health department notified? Date?

**Appendix D: COVID-19 Training Roster**

**Date:**

**Person that conducted the training:**

Employee Name	Signature

**Appendix E: Documentation of Employee COVID-19 Vaccination Status – CONFIDENTIAL**

Employee Name	Fully or Partially Vaccinated <sup>1</sup>	Method of Documentation <sup>2</sup>

<sup>1</sup>Update, accordingly and maintain as confidential medical record

<sup>2</sup>Acceptable options include:

- Employees provide proof of vaccination (vaccine card, image of vaccine card or health care document showing vaccination status) and employer maintains a copy.
- Employees provide proof of vaccination. The employer maintains a record of the employees who presented proof, but not the vaccine record itself.
- Employees self-attest to vaccination status and employer maintains a record of who self-attests.

## **Additional Consideration #1**

### **Multiple COVID-19 Infections and COVID-19 Outbreaks**

This addendum will stay in effect until there are no new COVID-19 cases detected in the exposed group for a 14-day period.

#### **COVID-19 testing**

- We provide COVID-19 testing at no cost to all employees, during paid time, in our exposed group except for:
  - Employees who were not present during the relevant 14-day period.
  - Employees who were fully vaccinated before the multiple infections or outbreak and who do not have symptoms.
  - COVID-19 cases who did not develop symptoms after returning to work pursuant to our return-to-work criteria, no testing is required for 90 days after the initial onset of symptoms or, for COVID-19 cases who never developed symptoms, 90 days after the first positive test.
- COVID-19 testing consists of the following:
  - All employees in our exposed group are immediately tested and then again one week later. Negative COVID-19 test results of employees with COVID-19 exposure will not impact the duration of any quarantine, isolation, or exclusion period required by, or orders issued by, the local health department.
  - After the first two COVID-19 tests, we continue to provide COVID-19 testing once a week of employees in the exposed group who remain at the workplace, or more frequently if recommended by the local health department, until there are no new COVID-19 cases detected in our workplace for a 14-day period.
  - We provide additional testing when deemed necessary by Cal/OSHA.

We continue to comply with the applicable elements of our CPP, as well as the following:

1. Employees in the exposed group wear face coverings when indoors, or when outdoors and less than six feet apart (unless one of the face-covering exceptions indicated in our CPP apply).
2. We give notice to employees in the exposed group of their right to request a respirator for voluntary use if they are not fully vaccinated.
3. We evaluate whether to implement physical distancing of at least six feet between persons, or where six feet of physical distancing is not feasible, the need for use of cleanable solid partitions of sufficient size to reduce COVID-19 transmission.

#### **COVID-19 investigation, review and hazard correction**

We immediately perform a review of potentially relevant COVID-19 policies, procedures, and controls and implement changes as needed to prevent further spread of COVID-19.

The investigation and review is documented and includes:

- Investigation of new or unabated COVID-19 hazards including:
  - Our leave policies and practices and whether employees are discouraged from remaining home when sick.
  - Our COVID-19 testing policies.
  - Insufficient outdoor air.
  - Insufficient air filtration.
  - Lack of physical distancing.
- Updating the review:
  - Every thirty days that the outbreak continues.

- In response to new information or to new or previously unrecognized COVID-19 hazards.
- When otherwise necessary.
- Implementing changes to reduce the transmission of COVID-19 based on the investigation and review. We consider:
  - Moving indoor tasks outdoors or having them performed remotely.
  - Increasing outdoor air supply when work is done indoors.
  - Improving air filtration.
  - Increasing physical distancing as much as feasible.
  - Requiring respiratory protection in compliance with section 5144.

**Buildings or structures with mechanical ventilation**

We will filter recirculated air with Minimum Efficiency Reporting Value (MERV) 13 or higher efficiency filters, if compatible with the ventilation system. If MERV-13 or higher filters are not compatible, we will use filters with the highest compatible filtering efficiency. We will also evaluate whether portable or mounted High Efficiency Particulate Air (HEPA) filtration units or other air cleaning systems would reduce the risk of transmission and, if so, implement their use to the degree feasible.

## **Additional Consideration #2**

### **Major COVID-19 Outbreaks**

This addendum will stay in effect until there are fewer than three COVID-19 cases detected in our exposed group for a 14-day period.

We continue to comply with the Multiple COVID-19 Infections and COVID-19 Outbreaks addendum, except that the COVID-19 testing, regardless of vaccination status, is made available to all employees in the exposed group twice a week, or more frequently if recommended by the local health department.

In addition to complying with our CPP and Multiple COVID-19 Infections and COVID-19 Outbreaks addendum, we also:

- Provide employees in the exposed group with respirators for voluntary use in compliance with section 5144(c)(2) and determine the need for a respiratory protection program or changes to an existing respiratory protection program under section 5144 to address COVID-19 hazards.
- Separate by six feet (except where we can demonstrate that six feet of separation is not feasible and there is momentary exposure while persons are in movement) any employees in the exposed group who are not wearing respirators required by us and used in compliance with section 5144. When it is not feasible to maintain a distance of at least six feet, individuals are as far apart as feasible.
- Install cleanable solid partitions that effectively reduce transmission between the employee and other persons at workstations where an employee in the exposed group is assigned to work for an extended period, such as cash registers, desks, and production line stations, and where the physical distancing requirement (described above) is not always maintained.
- Evaluate whether to halt some or all operations at the workplace until COVID-19 hazards have been corrected.
- Implement any other control measures deemed necessary by Cal/OSHA.

## **Additional Consideration #3**

### **COVID-19 Prevention in Employer-Provided Housing**

#### **Assignment of housing units**

We, to the extent feasible, reduce employee exposure to COVID-19 by assigning employee residents to distinct groups and ensure that each group remains separate from other such groups during transportation and work. Shared housing unit assignments are prioritized in the following order:

- Residents who usually maintain a household together outside of work, such as family members, will be housed in the same housing unit without other persons.
- Residents who work in the same crew or work together at the same workplace will be housed in the same housing unit without other persons.
- Employees who do not usually maintain a common household, work crew, or workplace will be housed in the same housing unit only when no other housing alternatives are feasible.

#### **Ventilation**

We ensure maximization of the quantity and supply of outdoor air and increase filtration efficiency to the highest level compatible with the existing ventilation system in housing units. If there is not a Minimum Efficiency Reporting Value (MERV) 13 or higher filter in use, portable or mounted HEPA filtration units are used, where feasible, in all sleeping areas in which there are two or more residents who are not fully vaccinated.

#### **Face coverings**

We provide face coverings to all residents and provide information to residents on when they should be used in accordance with state or local health officer orders or guidance.

#### **Cleaning and disinfection**

We ensure that:

- Housing units, kitchens, bathrooms, and common areas are effectively cleaned to prevent the spread of COVID-19. Housing units, kitchens, bathrooms, and indoor common areas are cleaned and disinfected after a COVID-19 case was present during the high-risk exposure period, if another resident will be there within 24 hours of the COVID-19 case.
- Cleaning and disinfecting is done in a manner that protects the privacy of residents.
- Residents are instructed to not share unwashed dishes, drinking glasses, cups, eating utensils, and similar items.

#### **Screening**

We encourage residents to report COVID-19 symptoms to

Summer Shadley, Superintendent- Maxwell Unified School District

## **COVID-19 testing**

We establish, implement, maintain and communicate to residents' effective policies and procedures for COVID-19 testing of residents who had a close contact or COVID-19 symptoms.

## **COVID-19 cases and close contacts**

We:

- Effectively quarantine residents who have had a close contact from all other residents. Effective quarantine includes providing residents who had a close contact with a private bathroom and sleeping area, with the following exceptions:
  - Fully vaccinated residents who do not have symptoms.
  - COVID-19 cases who have met our return-to-work criteria and have remained asymptomatic, for 90 days after the initial onset of symptoms, or COVID-19 cases who never developed symptoms, for 90 days after the first positive test.
- Effectively isolate COVID-19 cases from all residents who are not COVID-19 cases. Effective isolation includes housing COVID-19 cases only with other COVID-19 cases and providing COVID-19 case residents with a sleeping area and bathroom that is not shared by non-COVID-19-case residents.
- Keep confidential any personal identifying information regarding COVID-19 cases and persons with COVID-19 symptoms, in accordance with our CPP **Investigating and Responding to COVID-19 Cases**.
- End isolation in accordance with our CPP **Exclusion of COVID-19 Cases and Return to Work Criteria**, and any applicable local or state health officer orders.

## **Additional Consideration #4**

### **COVID-19 Prevention in Employer-Provided Transportation to and from Work**

#### **Assignment of transportation**

To the extent feasible, we reduce exposure to COVID-19 hazards by assigning employees sharing vehicles to distinct groups and ensuring that each group remains separate from other such groups during transportation, during work activities, and in employer-provided housing. We prioritize shared transportation assignments in the following order:

- Employees residing in the same housing unit are transported in the same vehicle.
- Employees working in the same crew or workplace are transported in the same vehicle.
- Employees who do not share the same household, work crew or workplace are transported in the same vehicle only when no other transportation alternatives are feasible.

#### **Face coverings and respirators**

We ensure that the:

- Face covering requirements of our CPP Face Coverings are followed for employees waiting for transportation, if applicable.
- All employees who are not fully vaccinated are provided with a face covering, which must be worn unless an exception under our CPP Face Coverings applies.
- Upon request, we provide respirators for voluntary use in compliance with subsection 5144(c)(2) to all employees in the vehicle who are not fully vaccinated.

#### **Screening**

We develop, implement, and maintain effective procedures for screening and excluding drivers and riders with COVID-19 symptoms prior to boarding shared transportation.

Summer Shadley, Superintendent, Maxwell Unified School District

#### **Cleaning and disinfecting**

We ensure that:

- All high-contact surfaces (door handles, seatbelt buckles, armrests, etc.) used by passengers are cleaned to prevent the spread of COVID-19 and are cleaned and disinfected if used by a COVID-19 case during the high-risk exposure period, when the surface will be used by another employee within 24 hours of the COVID-19 case.
- All high-contact surfaces used by drivers, such as the steering wheel, armrests, seatbelt buckles, door handles and shifter, are cleaned to prevent the spread of COVID-19 between different drivers and are disinfected after use by a COVID-19 case during the high-risk exposure period, if the surface will be used by another employee within 24 hours of the COVID-19 case.

- We provide sanitizing materials, training on how to use them properly, and ensure they are kept in adequate supply.

### **Ventilation**

We ensure that vehicle windows are kept open, and the ventilation system is set to maximize outdoor air and not set to recirculate air. Windows do not have to be kept open if one or more of the following conditions exist:

- The vehicle has functioning air conditioning in use and excessive outdoor heat would create a hazard to employees.
- The vehicle has functioning heating in use and excessive outdoor cold would create a hazard to employees.
- Protection is needed from weather conditions; such as rain or snow.
- The vehicle has a cabin air filter in use and the U.S. EPA Air Quality Index for any pollutant is greater than 100.

### **Hand hygiene**

We provide hand sanitizer in each vehicle and ensure that all drivers and riders sanitize their hands before entering and exiting the vehicle. Hand sanitizers with methyl alcohol are prohibited.
